About This Game

Dry Erase is an infinite whiteboard in virtual reality.

Features

- **Never run out of writing space:** simply grab the surface, scroll over to a blank area, and continue writing! You'll never reach an edge, because there aren't any.
- Choose from 750+ marker color and thickness combinations.
- Nothing is permanent: either use the built-in **eraser** to clear an area on the board or use **undo and redo** to erase recent strokes.
- Markers provide **haptic feedback** while drawing and feature adjustable **marker smoothing** to help you write legibly.
- **Import images** (JPG/PNG/TIFF/GIF/BMP/ICO) and arrange them on the whiteboard. Use them to create moodboards, do homework assignments, prepare presentations, or even to do code reviews.
- **The perfect study space:** import PDF course material, grab a virtual marker, and shut yourself off from all outside distractions. You can even record your homework sessions to share them with your classmates and the world using the interactive desktop view and recording software of your choice.

-
- **Export your drawings as SVG images** and view them in the browser when you're not in VR, import them into your office suite, or share them with your team. Also useful for recording your own signature for embedding in documents or emails.

Title: Dry Erase: Infinite VR Whiteboard

Genre: Indie

Developer:

Tom Sanders

Publisher:

Silvr

Release Date: 19 Jul, 2017

a09c17d780

Minimum:

OS: Windows 10

Processor: Intel Core i5-4590

Memory: 8 GB RAM

Graphics: NVIDIA GTX 970

DirectX: Version 11

Storage: 100 MB available space

English

$$M|_{x=2m} = M|_{x=0} + \Delta M$$

$$= 0 + [-2kN(2m)] = -4 \text{ kN}\cdot\text{m}$$

$$\sum F_y = 0$$

$$2T_A = 150(9.8) \text{ N}$$

$$\Leftrightarrow T_A = 75(9.8) \text{ N} = \frac{1}{2} W$$

$$\vec{a} \cdot \vec{b} = a_1 b_1 + a_2 b_2$$

$$\Leftrightarrow$$

$$\vec{a} \cdot \vec{b} = 0 \Leftrightarrow$$

$$\Leftrightarrow \infty$$

Beam Diagram: A horizontal beam of length 4m is shown. A uniformly distributed load of 15 kN/m^2 is applied over the right half (2m). The right end is labeled 'B'.

Moment Diagram: The bending moment M (in $\text{kN}\cdot\text{m}$) is plotted against position x (in cm). The diagram shows a parabolic curve starting at 0 at $x=0$ and reaching a maximum value at $x=2\text{m}$.

Shear Force Diagram: The shear force V is plotted against position x . It shows a linear decrease from 0 at $x=0$ to -2 kN at $x=2\text{m}$.

Equations:

$$V|_{x=4\text{m}} = V|_{x=2\text{m}} + \Delta V = -2 \text{ kN} - (15 \text{ kN/m} \cdot 2 \text{ m})$$

Moment Calculation:

$$M|_{x=2\text{m}} = M|_{x=0} + \Delta M = 0 + [15 \text{ kN/m} \cdot (-2 \text{ m})] = -30 \text{ kN}\cdot\text{m}$$

Vector Calculations:

$$a \cdot b = |a||b|\cos\theta$$

$$\cos\theta = \frac{a \cdot b}{|a||b|}$$

$$a \cdot b = 0 \Leftrightarrow |a||b|\cos\theta = 0$$

$$\Leftrightarrow \cos\theta = 0 \Rightarrow \theta = 90^\circ$$

Force Diagram: A force F is shown acting on a point. The vertical component is $F \sin(\theta)$ and the horizontal component is $F \cos(\theta)$.

Equilibrium Equations:

$$\sum F_x = 0 \Rightarrow T \cos(\theta) = \frac{1}{2} W$$

$$\sum F_y = 0 \Rightarrow T \sin(\theta) = W$$

dry erase infinite vr whiteboard

doesnt seem to have any teleporting or movement features built in and it spawns me on the other side of the white board so i cant actually use it i would love if you could at least basic movement so we can get to a optimal place to write
